DETAILED ACTION

This application was filed 12/8/2005. Claims 1-11 are before the Examiner and are subject to the following lack of unity of invention.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-3 (in part), drawn to a method for modifying an organic pigment wherein the compound has A as =N-.

Group 2, claim(s) 1-3 (in part), drawn to a method for modifying an organic pigment wherein the compound has A as =CH-.

Group 3, claim(s) 4-8 (in part), drawn to a process for converting a crude organic pigment using a compound of formula I wherein A is =N-.

Group 4, claim(s) 4-8 (in part), drawn to a process for converting a crude organic pigment using a compound of formula I wherein A is =CH-.

Group 5, claim(s) 9-10 (in part), drawn to a composition of a compound of formula I wherein A is =N-.

Group 6, claim(s) 9-10 (in part), drawn to a composition of a compound of formula I wherein A is =CH-.

Group 7, claim(s) 11 (in part), drawn to a compound of a compound of formula I wherein A is =N-.

Group 8, claim(s) 11 (in part), drawn to a compound of a compound of formula I wherein A is =CH-.

2. The inventions listed as Groups 1-8 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common core of the formula (I) is well known in the art as part of a compound having antibacterial and antimicrobial activity, see quinine. due to this, the corresponding special technical feature does not qualify under unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
